Action Items

Analyze your existing emergency preparedness plans from an all hazards perspective. Think: what is likely, what is lacking?

Prioritize next steps in your preparedness planning

Put one or two specific, concrete steps on your calendar for the next two months (ex: look into local CERT training tonight; test fire alarms and extinguishers on August 30th)

Add 15 minutes of emergency prep planning to an existing recurring routine (ex: grocery planning, bill paying, yard work) to regularly to put next steps on your calendar
